## V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

### 1. Statement

Novelty (N)	Claims	1-17	YES
	Claims		NO
Inventive step (IS)	Claims	1-17	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-17	YES
	Claims		NO

### 2. Citations and explanations

Document 1: Microfilm of the specification and drawings annexed to the written application of Japanese Utility Model Application No. 30523/1990 (Laid-open No. 122275/1991)

Document 2: Microfilm of the specification and drawings annexed to the written application of Japanese Utility Model Application No. 37584/1983 (Laid-open No. 142575/1984)

Documents 1 and 2 disclose an actuator composed of a magnetic element fixed on an elastic shape-memory alloy.

However, none of documents 1 and 2, and the other documents cited in the ISR, discloses a constitution to drive an actuator by means of a magnetic field generated from a magnetic-field generator, using a super-elastic characteristic of a shape-memory alloy, as in the invention of the present application.

The invention of the present application enables precise control with good responsiveness by providing the above-mentioned constitution.

Accordingly, the invention of the present application appears to be novel and to involve an inventive step.

The invention of the present application relates to an actuator, and is clearly industrially applicable.
